A STATEMENT

In last week's issue of the "Miner" a paragraph appeared in which it stated that a Slav woman was lying on her death bed and that scarcely anyone goes to see her. Since the publication of the item in question, it has been discovered to be incorrect, and that the "Miner" was mis-informed in the matter. The husband is a hard working man and has done all he can for his wife. Also, she has had the best of medical attention, together with a trained nurse. It seems that the statement has been given to the news paper by some busy body, who is not particular about giving wrong impressions, or making false statements. The editor of the "Miner," like most human beings, is liable to make mistakes, but at all times, only too willing to rectify them, if in our power to do so. Some persons who have not much to do, have made it their business to make capital out of the item, and talk about what they absolutely know nothing, and will not even take the trouble to find out the truth before they talk. We will make this statement, that not ONE of the parties whom these persons say gave the item in question, have given the slightest bit of information whatsoever in this or any other matter in connection with their profession. These parties should not listen to gossip or twaddle, as they would not like others to talk about them. Please find out the truth before you make a mountain out of a mole hill.

EDITOR OF THE MINER

CANADA AND THE UNITED STATES

The invasion of Canada from an immigration standpoint it would appear is merely in its infancy. All eyes are on the west. It is the chief topic of conversation amongst the inhabitants of the older provinces and eastern and middle States of the republic to the south of us. Comparatively speaking, few have ever had an opportunity of investigating the possibilities of this Canadian North-West. It has been chiefly the young man who has ventured to combat the so-called hardships of pioneer life in a remote part of the unknown land, there to isolate himself and to take his chances of having neighbors settle around his domain. The lure of the west was the free homesteads of 160 acres of land. It looked good to the young man, but even he underestimated its true value, its productive powers and the rapid settlement of districts. Picture, as he would, the possibilities here, little or no attention was paid to his opinion by the former generations in the east and middle west. These pioneers have been coming in gradually and steadily but quietly for the past few years, until now, by a united effort, they are able to proclaim, in a loud voice, our splendid resources and possibilities, and command due attention amongst those who, not long ago would not listen to our opinions.

Watch any young man who comes west. He expands visibly, the restrictions of his former environments pass away from him. The triumphant, all-conquering, irresistible west has pre-empted the future, although its denizens never deny nor repudiate what they have inherited from the past. The Chicago Tribune, in an editorial on the emigration from the States to Canada, takes a sensible view of the matter and no doubt voices the sentiments of many of the fair thinking men of the east.

It says: "The outflow of population is more spectacular than the inflow. It causes alarm in the minds of many, because it is the same sort of movement that accomplished so much in the development of the United States. The west in changing localities was largely built up by settlers from the east, this latter term also being a movable one. Because of the knowledge of the splendid citizenship which is being lost Americans regret that the restless search for new lands is carrying pioneers across the border into Canada. The loss of good American stock is to be regretted, but the movement means progress. It means harmonious relationship between the northwestern states and the Canadian northwest. It means development of a new region by splendid citizens. It means a betterment of conditions by those whose fathers and grandfathers sought the same thing by western migration. In this instance the United States loses as the older states lost before."

It is well known that many of the eastern papers do not favor the movement of people from their surrounding districts to the more fertile provinces of the west, but the tendency to go west is irresistible, and they may as well submit to the inevitable.

The United States not very long ago,

took many of Canada's younger sons to develop the farms of which it was said "Uncle Sam" had enough for all. Canada at that time lost many good citizens. Many of these Canadians are now settling in the western provinces, and so a portion of the "splendid citizenship" which we are getting never did actually belong to Uncle Sam. They have tilled the soil in the middle states and are accustomed to farming under similar conditions as are required here, and consequently are a huge asset to the country, and as citizens are ideal.

Then too, they will assimilate more rapidly than other settlers, they forget to converse in "United States" and are the first to offer their allegiance to Canada, the land of their adoption.

Canada has thrown open her arms to greet this class of settlers, and all are satisfied at the treatment accorded them by Canadians, and it is hoped that nothing in the shape of a barrier will ever be set up against this class of emigrants. They are coming in with capital, they are building large factories, they are developing the lands, backed up by a bank account, they are developing mining properties and timber lands, they are coming in by the thousands per week. The era of progress and prosperity is just commencing. Our resources are practically undiscovered, and the response to our individual and collective testimonials will be a huge influx of every desirable class of settlers with the necessary capital to go ahead. "Watch us grow."

MCGILL MINING STUDENTS HERE

J. B. Porter, professor in mining engineering of McGill University, Montreal, arrived in town on Sunday morning and spent the day with O. E. S. Whiteside, manager of the International Coal & Coke Co., who is an old McGill man himself. On Monday morning thirty-six students of McGill School of Mining, together with their instructors, all under the direction of Prof. Porter, arrived in Coleman to spend a week looking over the mine in order to gain a practical knowledge of mining. This is an annual excursion for the pupils of the mining school, and it affords them an insight into the conditions of the practical side of mining. The school commences September 1st and continues until the end of April, then they get six weeks travelling among the various mines. The pupils visited Sudbury, then spent a week at Coleman and will go to Frank for a day. They will go to Moyle, Roseland and the Boundary in British Columbia. While here the officials of the mine made things very pleasant for the visitors and assisted them in every possible way. The boys think Coleman the prettiest and most healthy town in the Crow's Nest Pass. Following are the names of the visitors:

J. B. Porter, Professor of mining engineering; J. W. Bell, assistant professor of mining; J. A. Dresser, instructor in geology; J. C. Kemp, instructor in mining; H. P. Strangways, instructor in mining; M. S. Archibald, J. L. Ballson, A. F. Baillie, G. M. Boyd, E. F. Breget, F. K. Brunton, S. Brunton, L. L. Burdland, E. J. Conway, J. R. Cox, J. M. Eakin, C. B. Fitzgerald, W. J. Galbraith, H. B. Gillis, W. G. Hanson, P. R. Hilborn, W. A. Kennedy, G. B. LeForest, R. G. Macfarlane, I. R. McIntosh, O. S. McLean, J. S. Naird, J. J. O'Neill, H. W. Phillips, P. W. Racey, J. S. Snook, L. Stewart, F. G. M. Williams, R. H. Winslow.

Our Business Creed

We believe in the goods we are
handling out in the firm we are build-
ing up and in our ability to get results.
We believe that honest goods can be
passed out to honest people by honest
methods. We believe in working not
weaving, not knocking, and in the
pleasure of our work. We believe that
a man can reasonably expect to get
what he goes after, that one does not
now is worth two planned for the fu-
ture. We believe there is something
doing somewhere for every man ready
to do it. We believe we're ready right
now.

PINCHER CITY LOCALS

Read the "News" and hand it on.

Lance L. Morgan is up in the moun-
tains on a business trip.

Mr. and Mrs. Holden and son of
Clareholm, are visiting at Angus Ro-
bertson's.

The many friends of Charlie Mitchell
will regret to hear of his departure for
his home in Ontario.

Miss Elsie Harrod has returned from
a visit to friends in Macleod, and re-
ports a very enjoyable time.

It pays to advertise in the "News".
Thirty four miles by wagon is the re-
sult of reaching there so far.

at Fernie working in
up country electrical engineering.

Don't miss the game between the re-
nowned Pelican team and the local eleven
on their own grounds here Satur-
day at 6 p.m.

W. Buckingham has secured a position
in one of the retail stores in Cal-
gary. His family left that city Sunday
night.

W. McKenzie of Summerside, is getting
his race horse in shape for the coming
races in Cranbrook on the 18th
and 19th of May.

G. Duncan, who has been acting as
freight clerk at the C.P.R. station has
left for his ranch near Stettler, where
he will remain for the summer.

You do not get bargain groceries
when you deal with the Mercantile Co.
You get grocery bargains. We carry
the highest qualities procurable.

This is the time the farmer is busy.
He is the backbone of our country, and
his success is as important to the great
industries of our nation as to himself.

W. A. Legault was a witness at Ma-
leod Tuesday, when W. E. Mullins
was up for trial in connection with the
accident on the C.P.R. at Brockton last
December.

When a stranger comes to your town
and asks for information don't bring
out your bag of sorrows for his con-
tempt. He probably has enough of
his own and you won't make a "hit"
with him.

C. H. Bong has returned from an ex-
tended trip to the old country, and
has gone out to his ranch. Henry
Thistle who came over with him will
live with Mr. Bong and take up farm-
ing later on.

75 per cent of the seedling in this dis-
has been completed. The weather has
been ideal and the work progressed
very rapidly. Fall wheat is in ex-
cellent condition some of it being up above
three inches. Present indications are
most favorable for a huge crop.

W. A. Legault, agent of the C.P.R.
here is a busy man these days. The
carpenters are at work enlarging the
office, enlarging the ticket window and
making other changes which, when
completed, will make the station quite
up to the minute. Next move should
be enlargement of the freight shed and
the appointment of a warehouse
man as the amount of business con-
ducted warrants this in addition to a
day telegrapher. These improve-
ments coming at the end of the month
when reports have to be rendered,
make the work doubly difficult.

The foot ball match which was to
have taken place here on Friday last
did not materialize, the Cowley team
failing to put in their appearance for
reasons unstated. It put the local
team in an awkward position by reason
of having made elaborate preparation
for their entertainment, but it is
presumed the Cowley team have some
unfortunate excuse for their non-ap-
pearance. A practice game was play-
ed amongst the number of players and
spectators assembled for the game
and afforded an opportunity for dis-
playing ability on the field and the
members of the local team certainly
gave evidence that it will take a pretty
good aggregation to make a score at
their goal.

PINCHER CREEK

Things in town generally are assum-
ing their summer complexion which
is quite an improvement on the pale
appearance of winter.

The Odd Fellows attended service in
the Methodist church last Sunday
afternoon and expressed themselves as
having greatly enjoyed the same.

The new creamery is nearing com-
pletion. In a little while therefore,
the farmers will be able to have their
cream converted into butter without
turning the crank.

At the close of the regular services
last Sunday evening, a public temper-
ance meeting was held in the Presby-
terian church, at which considerable
interest was awakened.

A Ministerial Association of the
ministers of the town and surrounding
country has recently been decided upon
and a meeting was held in the
Methodist church on Monday, 20th
ultimo. The second meeting will be
held on Monday next at the rectory.

Mr. Stewart who arrived on Wednes-
day last to fill the office of principal
for the public school, entered upon his
duties on Thursday. He is to be con-
gratulated on having the courage to
introduce the strange novelty in Pin-
cher Creek, of using the "Lord's pray-
er" in opening school.

Just Think It Over

"The man who sends his money
away from his home town for goods
that he can buy at the local store here

more than he can possibly gain. He
serves at the foot of his own pros-
perity. It is a penny-wise and pound-
foolish business. Every hundred dol-
lars sent out of the county reduces the
working capital of the county just that
much. A prosperous county town in-
dicates a prosperous rural community.
If your towns look seedy and unkempt;
if the "for rent" signs in the store
windows stare you in the face; if the
merchants are discouraged, what is the
effect on town property--what does
the stranger, the investor, if you
please, think of the community in
general? Will he invest his money in
community that is not true to itself?
The thinking man knows that the price
of farm real estate depends as much
upon nearness to a good live town as
upon the producing power of the soil.
Rev. Wm. Philip, pastor of the Ar-
rington Methodist church, in a sermon
recently delivered from his Arrington
pulpit on the question of shopping out
of your own town, said:
"The question has often come to us,
'Is a man an honest man who lives in
one place and deals almost exclusively
in another?' It may be at times that
a man cannot obtain what he really
needs without going outside. We deal
with principles and lay down no rules
to which there may not be some excep-
tion, but it occurs to us that there is
something too selfish to be honest in
community that is not true to itself.

something too selfish to be honest in
community that is not true to itself.
The thinking man knows that the price
of farm real estate depends as much
upon nearness to a good live town as
upon the producing power of the soil.
Rev. Wm. Philip, pastor of the Ar-
rington Methodist church, in a sermon
recently delivered from his Arrington
pulpit on the question of shopping out
of your own town, said:
"The question has often come to us,
'Is a man an honest man who lives in
one place and deals almost exclusively
in another?' It may be at times that
a man cannot obtain what he really
needs without going outside. We deal
with principles and lay down no rules
to which there may not be some excep-
tion, but it occurs to us that there is
something too selfish to be honest in
community that is not true to itself.

COLD LUNCHEONS FOR HOT DAYS

Removing Pulp of Orange for Fruit Salad

Combination Fork and Spoon for Salad

Squeezing Lemons through a Towel

Seasoning Tray

OUR hot weather may have been slow in coming this year, but when it arrived it came in force. The first oppressive heat turned the thoughts as longingly toward the joys of cool adjuncts as though we had not shivered through the days misallied spring and summer in the calendar, and clung to furnace fires until well along in June.

The first sign of the hot weather palate probably showed itself in the demand for iced tea instead of hot at the noon and evening meals, and if the effect of the temperature upon the appetite appeared in no other way, it was by the general distaste for hot dishes that had been popular a little earlier.

The housekeeper makes a great mistake who does not study the needs of her family in the hot weather and understand that the food their systems crave with the thermometer in the nineties is something entirely different from that which pleased them in winter.

It is not their pleasure alone that she studies, when she gives them a different dietary. Their digestions suffer from the languor which infects the rest of the body, and their stomachs cannot stand as strong meat now as that it could dispose of when they were braced for effort by cool weather. They need less food, and that given them must be of a lighter nature than is comprised in the winter bill of fare.

SALAD A STANDBY

As a matter of course, the stand-by in most cases is salads. Of these there is a noble array, and the dressings to accompany them may be of varied character. To some the French dressing appeals especially, and there are some salads with which it seems the only fit dressing. In other cases the mayonnaise is more suitable, and for those who do not care for either there are admirable boiled dressings.

Then the salads themselves! I often think it would be easier to say what could not be used in a salad than to enumerate the articles of food that may be thus served.

Housekeepers are much mistaken who look upon chicken or fowl of any sort as the only meat fit for a salad. Meat of all kinds—individually, collectively or in family groups—may thus be served. Cold beef, sliced or minced and well seasoned, cold lamb, cold veal, likewise treated; ham or tongue, alone, or mixed with other meat or with chicken; meat boiled, broiled or roasted, made into savory loaf, and this served in a large mould and sliced, or in small moulds and served one to each person on a bed of lettuce or of crisp—these are some of the possibilities of meat salads.

Fish and eggs come not far behind. Any kind of cold boiled or baked fish can be used as a salad. A rich fish salad is made of cod, halibut or other firm white fish, boiled, sliced and served on lettuce with a garnish of sardines. Mayonnaise is eaten with this, and a sardine may be flaked and mixed with the dressing. A fish salad cooked in the usual

way and served on lettuce, may have placed over it a layer of thinly sliced cucumbers. Minced fish baked in individual moulds and served on lettuce, is delicious, and if the mould is ornamented with sliced olives and eggs before the fish is put in, so much the prettier. Jellyed fish, or fish served in aspic, in large forms or small, is as attractive to the eye and the palate as jellyed fowl.

POSSIBILITIES OF EGGS

Eggs may be sliced and eaten accompanied with lettuce and a French, a mayonnaise or a boiled dressing. They, too, may be served in aspic in a form.

Or they may be stuffed and thus offered with lettuce or crisp or escarole and a dressing. Or the whites and yolks of the hard-boiled eggs may be made into a nest salad, the whites shredded for the nest, the whole yolks laid in the midst of these for the eggs, and a mayonnaise or boiled dressing poured over all.

When it comes to vegetable salads the housekeeper may call the whole contents of the garden her own. I have yet to see the vegetable that would not be good in a salad, unless it may be squash, turnips and pars-

nips, and there may be some eccentric persons who like even these cold!

But cabbage and cauliflower, beans and peas, beets and onions, carrots and cucumbers, tomatoes and potatoes, and all the great varieties of green salad plants, should find their places in a dressing, either raw or cooked, as nature and taste see fit to indicate.

Fruit salads, too, there may be, the fruit served alone or in a mélange. Melons, oranges, pineapples, pears, peaches, apples, bananas, grape-fruit, berries, nuts, many of the kindly fruits of the earth, seem even more kindly when accompanied by a good salad dressing.

Already there has been talk of jellyed soups for hot weather, and I have given directions for these. In the same line are the aspic jellies, both of meat and vegetables. The latter may vary the former, and are sometimes at hand when the meat jelly is not easily attained.

Aspic Jelly From Meat.
Soak a half box of gelatine in cold water enough to cover it for an hour. Have ready a pint of good clear beef broth. This can be made from the fresh beef or the consommé; or bouillon sold in cans may be used. If the meat is to be bought and cooked

for the purpose, add to the two pounds of beef you will need a pound of veal cut from the leg and include a knuckle of veal as well. Season well with carrot, onion, parsley, a bay leaf and a stalk of celery. Clear with white of egg and strain.

Pour the hot consommé upon the soaked gelatine, add a tablespoonful of tarragon vinegar, lacking this, of sea plain vinegar, salt and pepper to taste and strain. Put it aside in a cool place to form.

If it is to be used in garnishing, turn it into a square tin with straight sides. If the jelly may more easily be cut into dice. If meat and fish are to be included in it, let it begin to form before you put it in a mould and arrange in it the solid materials. In any case the mould must be wet with cold water before the jelly goes into it.

Tomato Aspic.

Stew fresh tomatoes or use the canned, and in either case take from them a pint of the liquor. Put this over the fire for twenty minutes with a stalk of celery, a bay leaf and a small onion. Strain the tomato to be very pure add to it a teaspoonful of white sugar.

Pour the hot liquid upon a half box of gelatine which has been soaked for an hour in a cup of cold water, season to taste with salt and pepper, strain and set aside to form.

It is very attractive formed in a border mould and the centre filled with cold meat or fish. It may also be cut in cubes and used as a garnish for meat, fish, vegetables or eggs may be included in it in a large or a small mould.

Cucumber Aspic.

Peel two large cucumbers, slice, and put them with a small onion, sliced, over the fire in two cups of water.

Boil quietly for an hour, add a half box of gelatine, which has been soaked in a cup of cold water, strain until dissolved, strain and set the liquid aside to cool. It may be used exactly like the tomato aspic, either as a salad by itself or as an accompaniment to other articles.

FAMILY MEALS FOR A WEEK

SUNDAY

BREAKFAST.
Melons, cereal, sardines, broiled brown bread, tea, coffee.

LUNCHEON.
Crisped rice, salad, cold young beets sliced with green peas, fried tea, huckleberry cake.

DINNER.
Cream of squash soup, broiled fresh beef's tongue, stuffed eggplant, lima beans, green corn, peach surprise, coffee.

MONDAY
BREAKFAST.
Fruit, cereal, bacon and fried eggs, baked toast, tea, coffee.

LUNCHEON.
Cold fresh beef's tongue, sliced cucumbers, cold chicken, chicken and chicken tea.

DINNER.
Brown potato soup, broiled steak, baked fish, cucumber salad, chicken and chicken tea.

TUESDAY
BREAKFAST.
Fruit, honey, boiled in milk, browned hash, quick blanch, tea, coffee.

LUNCHEON.
Dice of beef's tongue warmed in gravy with tender of green peas, onion soup, fried tea.

DINNER.
Beef soup, steak made from beef's head, lamb's liver, baked, plain boiled potatoes, green corn, spinach, sliced asparagus, chicken, coffee.

WEDNESDAY
BREAKFAST.
Fruit, corn, mince of liver, French fried toast, coffee.

LUNCHEON.

Clams a la Newburg, corn fritters, popovers, cold tea, juice.

DINNER.
Scotch broth, chicken, stewed whole; rice croquette, mushroom omelet, duck over, carrots sauté, hot blackberry shortcake, coffee.

THURSDAY
BREAKFAST.
Fruit, moulded oatmeal, cold; toasted bacon, hot muffins, tea, coffee.

LUNCHEON.
Minced chicken, beef corn bread, sliced potatoes au gratin, fried tea, junket.

DINNER.
Chicken soup (stock from day before), boiled cod, chicken with caper sauce, mashed potatoes, broiled corn, creamed young turnip, peach fritters, coffee.

FRIDAY
BREAKFAST.
Fruit, cereal, eggs poached in milk, green corn, tea, coffee.

LUNCHEON.
Tomatoes stuffed with shrimp, mayonnaise dressing, dressed, Roast mutton, crackers and cheese, coffee.

DINNER.
Mutton broth, baked blanch, duchesse potatoes, creamed onion, broiled mutton, apple cake with white wine, coffee.

SATURDAY
BREAKFAST.
Fruit, cereal, creamed fish in eggplant, whole wheat muffins, tea, coffee.

LUNCHEON.
Broiled mutton warmed over in caper sauce, creamed onion, broiled mutton and tomato salad, crackers and cheese, tea.

DINNER.
Cream of mutton soup, veal cutlet, Roast mutton, kidney beans, chicken, potato, coffee.

Home Dressmaker Hints

IN USING paper patterns, the home dressmaker having some experience often relies too much on her own knowledge, disregards the directions given on the label of the pattern and frequently finds herself in trouble which could have been averted if the label had been carefully studied and its instructions closely followed.

If one has the material, a style that would best develop the material should be selected—for instance, a gathered or shirred mode would not be suitable for a wiry or heavy material, while too plain a design would not develop well in soft clinging material.

On the labels of most patterns are given the widths and quantities of materials that cut to the best advantage without waste.

When the material and patterns have been selected, the label should be separated from the pattern, so that it can be referred to at any time without inconvenience. Then the illustrations must be studied carefully, and one of the several styles of making decided upon. This question settled, any pieces of the pattern which are not needed should be discarded, and any of the others that are to be used, but made of contrasting material—collars, cuffs, revers, yokes—should be laid aside.

Any changes on the pattern pieces, such as cutting off the sweep on a skirt if the round length is to be used, or the shortening of sleeves or coat, are next considered.

It is also practical to cross out with a colored pencil any of the perforations that are not required in making the style selected; this prevents confusion later on.

It is necessary to read the label very carefully to avoid mistakes. Then all the pattern pieces are pressed with a hot iron, which removes the wrinkle and gives more body to the paper.

Before starting to cut the garment it is necessary to place all the implements required for the work within easy reach.

Every woman who attempts such important work as dressmaking should equip herself with all the necessities in order to insure success. The following articles should be close at hand.

First of all, a medium pair of shears, about nine or ten inches long, well sharpened and a pair of scissors, some having cotton, needles, a thimble and a few weights are also required, with a few pins and buttons as a matter of course.

Woolen material should be sponged, and in any other goods all the heavy creases and wrinkles caused by folding and packing must be carefully pressed out before cutting.

Then the material is closely examined as to the nap, figure, stripes. The nap is always found on woollen materials, cloth or velvet by lightly rubbing the hand lengthwise of the material.

If there is perfectly smooth to the touch, the nap is down; if, however, it feels rough, the material has been stroked against the nap. The smooth strokes should always run toward the lower edge of the garment.

If the material is plain, without figure or stripe that is prominent enough to require matching, the pattern parts can be cut double, one for each side of the garment.

The double-width materials are left folded in the lengthwise crease, provided they are even, and the pattern can be laid on, giving due attention to the nap of the goods, which should run parallel with the perforations indicating the direction of material on which the pattern parts are to be cut.

How to Wear Colors

THE Auburn-haired woman looks best in the browns that shade into the tones of her hair or in the rich, dark greens.

The yellow-haired girl can wear red. The greens, too, are delightful on her; also certain yellow and blues. White is less becoming.

Blacks, particularly the pale and cold blues, are best adapted to brunettes whose color is warm.

The woman whose hair is dull and whose complexion and eyes lack brilliancy may still be attractive if she wears frocks that harmonize with her eyes and hair. Usually dull finished materials in browns, blacks and certain shades of blues that match the eyes are kindest to her.

A Pretty Fashion

WHAT may be, with skillful treatment, a very pretty fashion—that of making the sleeves of an evening gown different in color and fabric from the rest of the dress—has been revived.

In the case of a recently made evening gown, the sleeves were added to a white gown, with an outline of black upon the décolletage to connect the sleeves, as it were.

PINCHER CITY Mercantile Company, Limited

Great Sale of Winter and Spring Goods at Cost
No Bankrupt or Fire Sale, just an Immense Slaughter Sale
We must have room for Summer Goods that are daily arriving.
Never before such Bargains offered in the West

On May 7th, 8th and 9th, being Thursday, Friday and Saturday of next week, we will sell the well known Thistle Brand Tomatoes at 10c per tin. Not more than one case to each customer. Same price to mail order customers with \$10 orders.

∴ It will pay you to ∴
